## PRODUCTS

All TIMEWELL products are "field and laboratory tested"

## Product Testing

All TIMEWELL products are "field and laboratory tested." All incoming raw materials are tested to make sure they meet our strict quality specifications. Plus, we field test our products to make sure they will meet or exceed your needs on the job site. TIMEWELL is recognized as the industry leader in production, distribution and customer satisfaction. No other company can offer the resources available from TIMEWELL.

But we don't stop there - all TIMEWELL tubing and materials are also tested by independent laboratories to help further our commitment to quality. TIMEWELL is a growing and aggressive company. The company is recognized for our unmatched ability to deliver in a timely manner and exceptional customer service.

## Business-Wide Quality Commitment

We will provide both our external and internal customers with the highest quality product available in the quickest, most efficient manner possible.

## Quality Facts About TIMEWELL

- MAXFLO dual wall conforms with AASHTO M252 and M294
- TIMEWELL drainage products meet or exceed all ASTM standards for quality including but not limited to ASTM F 405, ASTM F 667, SCS 606 and AASHTO M252.
- TIMEWELL has completed the requirements necessary to be ISO 9000 compliant. This effort has been undertaken under the guidance of the Illinois Manufacturers Extension Center. TIMEWELL is one of only two drainage companies in the nation to work under such stringent quality guidelines.
- Updated Testing Lab In 2002, TIMEWELL completely renovated our quality control lab adding new testing equipment and additional personnel to insure even more consistent quality
